

# TRAYSEALING

## SERIE 600

Wide range of traysealing solutions,  
individually designed to meet all  
packaging needs.

# TRAYSEALERS RANGE

IMPROVES THE PRESENTATION OF THE PACKAGED PRODUCT,  
INCREASES PRODUCTION AND REDUCES COSTS

## Wide range of heat sealing solutions

Flexibility, easy operation, reliability and robustness are the characteristics of our traysealers, individually designed to meet all the needs of the product to be packaged.

The MERELLO range of traysealers are machines with an innovative and robust design that can be completely adapted to the specifications of each customer. Built entirely in stainless steel, they have components and chassis with sanitizable design. They stand out for their versatility, durability and ease of use. High-end models offer maximum energy efficiency. For all these reasons, they are always a profitable investment together with the right consumables.

Remember that as manufacturers we have the means and the experience to design and manufacture your machine completely adjusted to your requirements.

## ME-600

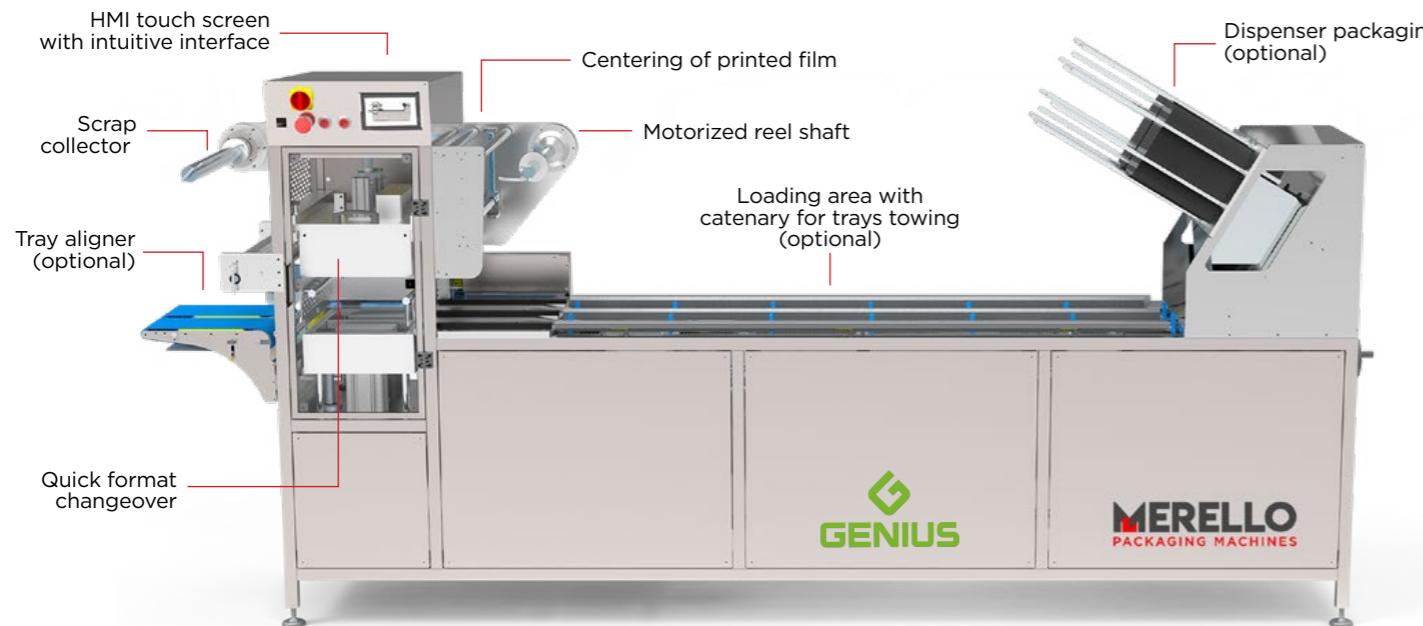

### SEMI-AUTOMATIC TRAYSEALING

Ready to be easily integrated into any production line, the ME-600 is a semi-automatic traysealer with very compact dimensions, capable of sealing all types of preformed trays.

This solution is ideal for efficient and cost-effective manufacturing of small to medium production runs.

It stands out for its high performance and its wide range of packaging possibilities, allowing atmospheric, vacuum, modified atmosphere (MAP), skin and CARTO-skin sealing of different outgoing product heights. A wide range of peripherals can be incorporated.

## ME-610

### FIRST CLASS TRAYSEALING

The ME 610 heat sealer combines the efficiency of the ME-600 with the robustness of the ME-620.

It combines pneumatic and servomotorized drives. Its sealing unit adapts in height to a wide variety of preformed trays. This machine ensures optimum process profitability. It can be integrated into any production line, increasing your production capacity.

## ME-620

### HIGH PERFORMANCE TRAYSEALING

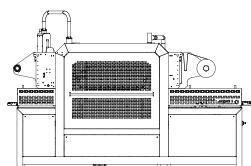

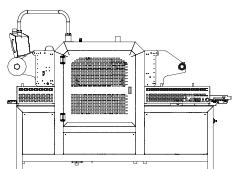

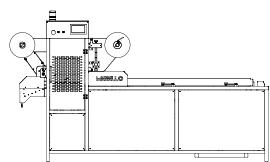

The ME-620 stands out for its high production capacity of up to 25 cycles/min thanks to its servo-driven drives, making it the ideal machine for medium and high production packaging lines.

Suitable for the whole range of containers. It allows atmospheric, vacuum, modified atmosphere (MAP), skin and CARTO-skin + 60 mm sealing. Its high performance ensures the profitability of the process and the multiple options expand its packaging capacity.

### ME-620 WITH OPEN DOORS

**TECHNICAL CHARACTERISTICS****ME-600****ME-610****ME-620**

Length (approx.)	1.300 a 3.500 mm	2.500 a 3.000 mm	3.000 a 3.500 mm
Width (approx.)	1.000 mm	800 a 1.000 mm	1.000 mm
Height (approx.)	max. 2.000 mm	max. 2.200 mm	max. 2.200 mm
Weight	530 Kg	1.500 Kg	1.500 Kg
Maximum power	9 kW	13 kW	15 kW
Pneumatic consumption	65 liters/cycle	75 liters/cycle	10 liters/cycle
Input voltage	400 V 3L+N+PE ± 10%	400 V 3L+N+PE ± 10%	400 V 3L+N+PE ± 10%
Connection	Remote VPN	Remote VPN	Remote VPN
Production	Up to 8 cycles / min	Up to 10 cycles / min	Up to 18 cycles / min
High tray	Up to 80 mm	Up to 140 mm	Up to 140 mm
Maximum area	275 x 400 mm	Depending on model	Depending on model

THESE SPECIFICATIONS WILL VARY ACCORDING TO CUSTOMER REQUIREMENTS.

## OUR TECHNOLOGY ALLOWS US TO OBTAIN DIFFERENT FINISHES WITH THE SAME MOLD
